**STRECK
TRANSPORT**

Keep your customers satisfied

Streck Transport has its origins in the border triangle of Germany – France – Switzerland and has successfully combined innovation with tradition since 1946, which is also a result of the ongoing education and training of our employees. Today, Streck Transport is not only a regional leader, but also active worldwide and optimally networked through cooperations.

With locations in Germany and Switzerland, we handle land transport as well as sea and air freight and also assume responsibility for storage activities or hazardous goods

matters. With our cooperations and networks, we are available for activities almost anywhere in the world.

Streck Transport guarantees the highest quality standards with certifications in all areas of the company. Numerous awards motivate us to continue along this path.

No matter when, no matter where, we connect you with your customers!

Land shipment

Each year, Streck Transport moves around 1.6 million shipments by land – as general cargo, as partial or complete cargo, nationally and internationally. Thanks to our daily scheduled transports and our membership in the leading general cargo cooperations NG.Network, CargoLine or System Alliance Europe, we reach every corner of Europe by land – and with impressive transit times!

Air freight

Whether it's general cargo or groupage shipments or chartering a cargo plane: with us, your air freight shipments will take off safely! Our extensive network connects you with all economic centres worldwide. Part of our special air freight service is that we load smaller shipments in a cost-effective way. It not only saves you money, but it is also good for the environment.

Sea freight

Are your overseas shipments not subject to much time pressure and yet you need flexible solutions for your deliveries? Great! Then you've come to the right place. We offer FCL inbound to ports of departure with all modes of transportation, FCL full containers worldwide, LCL consolidated containers to all mainports, door-to-door logistics, packaging, hazardous materials handling and much more, so your sea freight is guaranteed to stay afloat.

Logistics & Outsourcing

At Streck Transport we provide you with comprehensive capacities at all times, be it storage areas or pallet spaces. As a specialist in warehousing, we take care of your warehouse management or stock management. And if desired, we also take care of the collection of the goods or the transport – by overland transport, air freight or sea freight: because with Streck Transport, you simply get everything from a single source!

Supply Chain Management

We network you with your customers and suppliers and support you with process transparency and fast solution paths. Here, the possibilities range from the provision of our web platform „myStreck“ for order entry and shipping label printing to the individual mapping of complex logistics chains.

Dangerous goods and hazardous materials

Whether by land, air or sea: Streck Transport always has the perfect solution for your dangerous goods shipments. We are very familiar with all requirements and regulations and transport a variety of classified dangerous goods according to the current regulations. In addition, special hazardous materials warehouses are available in our logistics facilities.

Customs service

A large number of regulations must be observed in the international movement of goods. Streck Transport, simply by virtue of the fact that we have been transporting shipments across the Swiss-German border since the company was founded in 1946, has the experience it takes to get your shipments delivered smoothly to your customers around the world. So why don't you also benefit from our direct contacts with customs and our own border offices at all important border crossings to Switzerland?

Our locations

At our locations in Freiburg, Lörrach and Messkirch, Streck Transport offers you the complete range of land transport, air and sea freight as well as logistics services from a single source. In addition, we have 7 other locations throughout Germany near all important air and sea freight centers!
